

## Knowledge Test Procedures:

Students should be instructed to fill in their registration information completely and clearly. They must include their full name, full WDL#, test date, test location and test version. This information is required to be included on the knowledge test. This is very important.

To select an answer students should be instructed to fill in the circle completely. An X or O over their selection is NOT allowed.

If they wish to change an answer, they should put a large "X" over the answer they no longer want and completely fill in the circle with their new answer, then initial it to indicate that this is their final answer.

It is the responsibility of the C1 instructor to be sure the student completed their test registration information at the top of the page completely and used the proper markings to select and change their answers.

A visual aid is included for the student on the inside of the test booklet and on their answer sheet. See it below.

### Example of clearly marked answer

### Example of changing your answer

Instructors should mark incorrect answers with a clear "X" over the question number.

No instructor marks should be made in the grey area of the student answer sheet. Only student marks should be made in the bubble area. Do not make corrections in this space.

On the bottom of the answer sheet Pass or Fail should be marked, the number missed, percentage and instructor information must be completed.

**Instructor information, student registration and testing details must be completed entirely. \***

Two sided forms must have student information on both sides. Each side of the test form must be able to support itself independently.

*\*Not completing all required information on both sides of the form is a violation of our WMSP contract.*

## Knowledge Test Scoring

The permit knowledge test is **50** questions. A passing score is missing no more than 10 questions, which is 80%.

The endorsement knowledge test is **25** questions. A passing score is missing no more than 8 questions, which is 68%.

The 3-wheel knowledge test is **25** questions. A passing score is missing no more than 5 questions, which is 80%.
